Our Story

THE MOMENT NUDGE BECAME NECESSARY

Built for the way real people actually think

- We watched people freeze in front of a list they wrote themselves.
- One missed appointment could wipe out an entire day.
- So we built the thing we wished existed: Nudgely.

Cannot start

Even when they want to.

One missed block ruins the whole day

Rigid systems punish any deviation.

Family feels helpless

Watching someone you love struggle — with no tools to help.

We did not set out to build a productivity app. We set out to help someone we love.

The Problem

EVERY EXISTING TOOL MAKES IT WORSE

To-do Lists

Too many choices

You freeze before you even start.

AI Schedulers

Built for offices

Not for how your energy actually feels.

ADHD Apps

Rigid routines

Miss one block — your whole day falls apart.

Nothing adapts to you in real time. Nothing just lets you ask for help.

Meet Nudge

YOUR AI ASSISTANT - BUILT ON OFFLOAD

NUDGE

Just talk.
Nudge handles it.

Nudgely is a conversational AI that manages your schedule for you, so you never have to fight the app itself.

Understands natural language

Speak or type like you're texting a friend

Adapts in real time

Energy crashes, surprise tasks, lost time - it reshuffles instantly

Coaches, not just schedules

Tells you what to do first when you're overwhelmed

No Buttons. No menus. No Executive function required.

Nudge

Live Demo

Watch Nudge respond to real conversations in real time

Key Strengths

TWO PILLARS THAT MAKE NUDGELY DEFENSIBLE

1

Social Impact

Executive dysfunction affects millions.

ADHD, autism, anxiety, depression — all impair the ability to start, switch, and sustain tasks.

Every productivity tool ignores them.

Those tools were not built for brains like theirs. Nudgely is. It meets them where they are.

The market is massive and untapped.

Schools, clinics, workplaces, and families — all underserved. All reachable.

Technical Innovation

The AI does not just move blocks.

It gives context-aware, personalized life advice — based on your real habits, energy patterns, and history.

It tells you what to do and how to do it fast.

Say you are overwhelmed. Nudgely does not reschedule — it walks you through exactly what to do first.

It gets smarter the more you use it.

Every conversation trains a model of you — so advice becomes more accurate over time.

Nudgely is not a calendar app. It is a thinking partner — for every brain.

Your brain works differently.
Nudge works with it.

Thank you.
